ETIMAT P10

PS / SS Interruptor auxiliar de señalización ETIMAT P10

PS / SS Auxiliary signal switch for ETIMAT P10

Este dispositivo puede ser configurado como un interruptor auxiliar o como un interruptor de señalización; dependiendo de la configuración seleccionada, el dispositivo se puede emplear para indicar el estado de conmutación de un dispositivo conectado en serie del tipo ETIMAT P10.

Interruptor auxiliar = señalar el estado de los contactos

Interruptor de señalización = el indicador del dispositivo se dispara en caso de fallo
Incluso instalados, todos los terminales son fácilmente accesibles desde arriba.

A device which can either be set up as an auxiliary switch or a signal switch; depending on the setting selected, this device may be used for remote indication of the current switching status of a switching device in the type series ETIMAT P10 MCB.

Auxiliary switch = contact position indication

Signal switch = indication device tripped on fault occurrence

Instalación y funcionamiento:

- Este interruptor se instala junto con el dispositivo de desconexión en el soporte del carril. Por lo tanto, en caso de que sea necesario, ambos pueden extraerse a la vez del soporte y ser reemplazados. Antes del montaje, el interruptor auxiliar universal se ajusta en la función deseada, marcada en la etiqueta, girando el tornillo de ajuste. (Fig. 1)
- El dispositivo, proporciona una abertura para el disparo, esta abertura esta pretrouquelada para la fácil conexión. (Fig. 2)
- La conexión al dispositivo se realiza mediante dos abrazaderas de sujeción, la operación se efectúa a través del conector de disparo o a través de la pieza de conexión al interruptor. (Fig. 3)
- El interruptor auxiliar universal (instalado) puede funcionar sin la actuación del dispositivo de desconexión.
- Con este fin, el conector para la desconexión se retira; entonces, utilizando un destornillador pequeño, se activa la función TEST del interruptor auxiliar. (Fig. 4)

Installation and operation:

- This switch is mounted together with the switching device on the support rail. If required, therefore, both may be removed together from the assembly and replaced.
- Before fitting, the universal auxiliary switch will be set to the desired function auxiliary switch or signal switch by turning the adjusting-screw, marked by an appropriate label. (Fig. 1)
- On the relevant switching device, an aperture for the tripping pin is provided; this aperture is broken out. (Fig. 2)
- Connection to the switching device is effected by two retaining clamps, operation is effected via the tripping pin or the connecting piece to the toggle switch. (Fig. 3)
- For test purposes, the universal auxiliary switch (in assembled condition) may be operated without actuation of the switching device. To this end, the connecting pin to the protective switching device toggle is withdrawn; then, using a small screwdriver, activate the function TEST of the auxiliary switch. (Fig. 4)

ETIMAT P10 RC

Control Remoto / Remote Control

ETIMAT P10 RC es un interruptor magnetotérmico industrial con un mecanismo de control remoto.

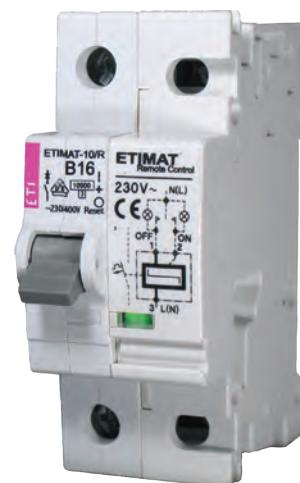

Ventajas:

- Desconexión remota con protección simultanea
- Un espacio mínimo
- Accionamiento directo
- Puede utilizarse como accionador en cualquier instalación de sistema bus
- Seguro contra activación remota tras la desconexión manual y/o que se dispara por sobretensión
- Bobina de control para protegerse contra sobrecargas
- Instalación sencilla garantizada gracias al rápido método de fijación
- Visualización del estado: rojo ON / verde OFF
- Palanca de control de cierre hermético
- Posibilidad de añadir un interruptor auxiliar

ETIMAT P10 RC is a miniature circuit breaker with remote control mechanism.

Advantages:

- Remote switching with simultaneous protection
- Minimal space requirement
- Straightforward actuation
- Can be used as actuator in any installation bus system
- Secure against remote activation after manual switch-off and/or being tripped by overcurrent
- Control coil protected against thermal overload
- Easy installation assured by rapid fastening method
- Visual status display : red ON / green OFF
- Sealable control lever
- Capability of adding an auxiliary switch

Datos técnicos:

El mecanismo del control remoto, que sirve para accionar el ETIMAT P10 RC es conectado en la fábrica al Etimat P10, antes de su expedición.

El mecanismo de control remoto se activa de forma electromagnética aplicando un control de voltaje según los siguientes datos:

- Tensión nominal: 230 V AC
- Corriente de excitación: aprox. 1,5 A, duración mínima 20 ms
- Número de operaciones: 20.000, máx. 12 por minuto

Technical Data:

The remote control mechanism, which serves to actuate ETIMAT P10 RC is connected to Etimat P10 MCB by the factory before dispatch.

The remote control mechanism is activated electro-magnetically by the application of a control voltage acc. to following data:

- Rated voltage: 230 V AC
- Exciting current: approx 1.5 A, duration min 20 msec
- No. Of operations: 20.000, Max 12 per minute

$$k = \frac{I(x^{\circ}\text{C})}{I(30^{\circ}\text{C})}$$

El factor de conexión es valido para corrientes con tiempos por encima de los 30 segundos $I(x^{\circ}\text{C})$ – prueba de corriente a temperatura ambiente X I (30 °C) – prueba de corriente a temperatura ambiente 30 °C.

Conection factor is valid for current with times over 30 s $I(x^{\circ}\text{C})$ - test current at X ambient temperature I (30 °C) - test current at 30 °C ambient temperature.

ETIMAT 6

| | |
|--|----------------------------------|
| Tensión nominal / Rated voltage | 230/400 V AC max. 60 V DC |
| Intensidad nominal / Rated current | 6 – 63 A |
| Rated frequency / Frecuencia nominal | 50/60 Hz |
| Poder de corte nominal Rated short-circuit capacity | 6 kA |
| Clase de energía límite / Energy limiting class | 3 |
| Curva de disparo / Tripping characteristic | B or C |
| Terminales / Terminals | 1–25 mm ² , max. 3 Nm |
| Ancho / Build-in width | 18 mm/pol |
| Montaje de carril / Mounting on the rail | EN 60715 (EN 50022) |
| Precintable / Sealing possibility | ON or OFF |
